TARGET GROUPS OF STUDENTS

1. Banking professionals wishing to move to a quant analyst role, e.g. in credit risk and risk management.
2. Model validators and risk professionals wishing to expand their knowledge in order to cope with increasing demands from regulators for more sophisticated models.
3. Junior quants who want to learn about advanced modelling techniques.
4. Physicists, engineers and researchers in other fields looking for a new career in the field of the credit risk and risk management, where the demand for qualified specialists is very high (see an article in The Financial Times, April 27, 2014).
