

## Basic materials list

A list of all basic materials provided by Attenborough Arts Centre for practical art courses and workshops are listed overleaf.

This is a list of the materials that the centre stocks as standard for use within all courses. The centre will aim to keep these items in reasonable supply throughout the term. If you notice that the stock of a particular item is running low please inform front of house. Your assistance with this would be much appreciated.

If you require any additional materials that are not listed on the basic stock list for the delivery of a course you **must** request these as additional items on your course/workshop proposal form.

Although we will aim to try and provide any additional requested materials please note that this provision cannot be guaranteed. The availability and cost of additional materials will need to be taken into account when programming courses. If there are any difficulties or concerns regarding the provision of additional materials tutors will be contacted as appropriate to discuss.

Additional materials requested for courses and workshops will be left in the basic stock unless a different arrangement has been made. Tutors should not use materials outside of the basic stock unless they have requested them on their course/workshop proposal form and the provision has been agreed in advance.

As previously advised it has not been possible to include all items suggested by tutors for the basic stock list. The list reflects the basic materials required for the majority of practical courses and workshops

Kind regards

**John Kirby**
