

ACADEMIC SEMINAR

Mechanisms of RAS/ RAF oncogene-induced tumour development

PROFESSOR CATRIN PRITCHARD

Professor of Cancer Biochemistry, LCRC

Catrin is Professor of Cancer Biochemistry within the Leicester Cancer Research Centre. Her talk will include the following elements:

- Summary of how genetic models for KRAS- and BRAF-induced cancers have been used to understand mechanisms of cancer initiation and progression
- Characterisation of the role of the microenvironment in tumour development, focussing on tumour associated macrophages
- Development of a novel ex vivo tumour platform for cancer drug discovery and development
