

"People ask me to predict the future, when all I want to do is prevent it. Better yet, build it. Predicting the future is much too easy, anyway. You look at the people around you, the street you stand on, the visible air you breathe, and predict more of the same. To hell with more. I want better." *Ray Bradbury, Beyond 1984: The People Machines*

"In times of change, learners inherit the Earth, while the learned find themselves beautifully equipped to deal with a world that no longer exists." *Eric Hoffer*

The Creating Academic Learning Futures Project (CALF) is organising Design for the Future Workshop

- During the workshop you will discover and experiment with a range of tools for learning on the Internet – over coffee and biscuits.**
- You will explore the applications of wikis for sharing ideas, collating and presenting resources. You will find out how to use Google and Twitter for finding, and organising content and people in real time, for self-promotion and networking – over more coffee and biscuits.**
- As designers of the future you will create collaboratively designs for the future of learning in a guided process, and assemble rich media to support and communicate the ideas in your designs – over lunch.**
- You will be able to apply these newly acquired skills to support your learning in your course and in your future design practice.**

Available sessions:

7 December 2009 10:00-16:00

8 December 2009 10:00-16:00

You will be given a sign-up sheet for the workshops – please, indicate the time and date of the session you will attend.
