Trinity  Additional Manuscripts a
   Title: Papers of Francis Skinner
   Reference: 407
   Covering Dates: 1930s
   Extent and Medium: 2 boxes

Content and context
   The material described here was deposited in Trinity College Library
by the Mathematical Association in 2002. It had previously been
 donated to them by Reuben Louis Goodstein, a former President, in
the 1970s. The majority of the archive originated with Francis
Skinner (1912-1941). Skinner was one of Wittgenstein’s favourite, and
most attentive students. In the important transitional period of the
mid-thirties he was one of the chosen students to whom Wittgenstein
dictated his thoughts. These dictations formed what are known as the
Blue and Brown Books
   Loaned on a short-term basis from the Mathematical Association's
Library at the University of Leicester.

Index Terms: Skinner, Sidney George Francis Guy (1912-1941)
Wittgenstein, Ludwig Josef Johann (1889-1951) philosopher

Trinity/Add.Ms.a/407 contains:
1  Skinner’s notes of Wittgenstein's lectures for the academic year
   1934-35, lecture VII onward. These notes provide considerable
   additional material to the lectures as published by Alice Ambrose
   and Margaret Macdonald.
   1 bundle.1934–35

2  Notes in the hand of Francis Skinner, probably made from
   dictations given by Wittgenstein to select students. These notes
   contain remarks that can be found in the Blue and Brown Books.
   1 bundle.[1934]

3  Manuscript dictations - the Brown Book includes additions and
   amendments in the hand of Skinner and remarks in the hand of
   Wittgenstein. Contains a considerable amount of material not
   included in the version published by Blackwell.
   6 vols.1934–35

4  Notes, probably a dictation by Wittgenstein.
   1 vol.c. 1935

5  R L Goodstein's copy of the Blue Book.
   2 vols.1933–34

6  Mathematical calculations by Skinner.
   1 doc. n.d.

7  Juvenile essay.
   1 vol. n.d.
