Adrian Building

PERSONAL EMERGENCY EVACUATION PLAN

FOR BUILDING USERS & VISITORS

Should an emergency arise where there is a need to evacuate the building, the fire alarm will sound. The alarm is a warbling sound. Fire Wardens will also tour the building wearing yellow tabards to assist with the evacuation.

If you have a disability or are less mobile it may be helpful for you to know about the following arrangements which will assist you in the event of an evacuation.

(1) It is possible for you to exit the building at first floor level via the bridge into the Medical Sciences Building, at ground floor level via the main entrance or into the Bennett Building, or at lower ground level through the goods entrance without assistance by following the Exit notices:

(2) At other levels return to the passenger lift situated within the main entrance staircase. You may have used this lift to access the building. The lift is located within a Refuge which is a place of safety where you can wait for assistance and is marked with the following symbol:

(3) Once at the Refuge, press the Evacuation Intercom button to summon assistance. This will alert the Fire Warden in charge of the evacuation to your location. If necessary, Fire Wardens will use the lift to evacuate you and ensure that you are assisted to the assembly point.

If you have any questions about these arrangements, please ask a member staff.
