PERSONAL EMERGENCY EVACUATION PLAN
FOR BUILDING USERS & VISITORS

Should an emergency arise where there is a need to evacuate the building, the fire alarm will sound. The alarm is a warbling sound. Fire Wardens will also tour the building wearing yellow tabards to assist with the evacuation.

If you have a disability or are less mobile it may be helpful for you to know about the following arrangements which will assist you in the event of an evacuation.

(1) It is possible for you to exit the building through some exits at ground level and lower ground level without assistance by following the Exit notices:

(2) At other levels return to the passenger lift with a colleague/assistant. There is only one passenger lift in the building and you may have used it for access. The lift is marked with the following symbol:

(3) Summon the lift. Enter the lift and press the button LG (the colleague/assistant should make their way down the stairs to the lower ground floor outside the lift doors). The lift will descend to the lower ground floor where you will meet your assistant/colleague. Exit the lift and go straight on. Turn left and exit the building via the side entrance. Wait outside clear of the building for further guidance.

If you have any questions about these arrangements, please ask a member staff.
