

1. Programme title(s) and UCAS code(s):

BSc Biological Sciences C100
BSc Biological Sciences (Biochemistry) C700
BSc Biological Sciences (Genetics) C400
BSc Biological Sciences (Microbiology) C500
BSc Biological Sciences (Physiology with Pharmacology) B1B2
BSc Biological Sciences (Zoology) C300
BSc Biological Sciences (Neuroscience) - B140
With optional Year in Industry or Year Abroad (in Europe, USA or Japan)

2. Awarding body or institution:

University of Leicester

3. a) Mode of study: Full time

b) Type of study: Campus-based

4. Registration periods:

The normal period of registration is three years (four years for degrees 'with a year in industry/abroad')

The maximum period of registration is five years (six years for degrees 'with a year in industry/abroad')

5. Typical entry requirements:

A-levels: typical offer AAB/ABB, normally including at least two relevant science subjects from Biology (preferred), Chemistry, Physics or Maths.

EPQ with A-levels: typical offer BBB + EPQ at grade B. A-level subjects to include two relevant science subjects from Biology (preferred), Chemistry, Physics or Maths. General Studies not accepted.

GCSE: At least Grade C in both English Language and Maths (if not held at A-level)

Access to HE Diploma: Pass relevant diploma with 45 credits at level three, with distinctions in some subjects.

International Baccalaureate: Pass Diploma with 32/30 points, including at least two relevant science subjects at Grade 6 at higher level.

BTEC Nationals: Pass relevant Diploma with DDD plus five GCSEs at B or above including two relevant sciences.

6. Accreditation of Prior Learning:

Direct 2nd year entry is considered subject to completion of a level 4 programme of comparable content to those studies in year 1 of this programme, passing all modules and with a year mark of at least 65%.

7. Programme aims:

The programme aims to provide:

- a flexible teaching and learning programme of high quality that is informed by an active research environment in which students develop their own interests

- a stimulating and supportive working environment;
- an education that will enable graduates to follow a variety of careers including higher degrees and research;

and to enable students to:

- have a broad appreciation of biological sciences or of biomedical and related disciplines with an emphasis on human health and disease, and advanced knowledge of one or more areas including appreciation of aspects of the underpinning research;
- develop a range of skills including practical and transferable skills;
- gain experience, within the 4 year Industry/abroad options, by working in in an external research laboratory or an American, Japanese or another European University.

8. Reference points used to inform the programme specification:

- QAA Benchmarking Statement
- University of Leicester Learning and Teaching Strategy 2016-2020
- University of Leicester Periodic Developmental Review Report
- External Examiners' reports (annual)

9. Programme Outcomes:

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
<i>(a) Discipline specific knowledge and competencies</i>		
(i) Mastery of an appropriate body of knowledge		
Demonstrate an awareness of main principles of biological sciences, biomedical sciences and related disciplines and explain core concepts of their chosen discipline. Describe current areas of advance in their chosen specialisation(s).	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work, directed reading, resource-based learning, and private study.	Examination, coursework (e.g. practical reports, written reports, data analysis, field reports, oral presentations, group reports, video production, poster production, dissertation)
(ii) Understanding and application of key concepts and techniques		
Describe and apply safely appropriate experimental procedures in biological sciences, biomedical sciences and related disciplines. Apply a scientific approach to the solution of problems in the context of their chosen specializations and appreciate the rationale of experimental design. Explain core concepts of their chosen discipline.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
(iii) Critical analysis of key issues		
Demonstrate a capacity for critical scientific analysis of issues in the context of biological sciences, biomedical sciences and related disciplines	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework
(iv) Clear and concise presentation of material		
Communicate orally and in writing concepts and arguments in biological Sciences, biomedical sciences and related disciplines.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework
(v) Critical appraisal of evidence with appropriate insight		
Demonstrate the capacity to analyse and criticise evidence from both experimental procedures and the literature.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework
(vi) Other discipline specific competencies		
In the year in industry/abroad programmes, demonstrate the capacity to work in an industrial or other research laboratory or study in another European, American or Japanese University.	Laboratory work, research project	Research report, practical reports.
(b) Transferable skills		
(i) Oral communication		
Communicate orally, with clarity and coherence, concepts and arguments in biological sciences, biomedical sciences and related disciplines.	Tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work.	Oral presentations, group reports, tutorials.
(ii) Written communication		
Communicate in writing, with clarity and coherence, concepts and arguments in biological sciences, biomedical sciences and related disciplines.	Tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work.	Examination and coursework
(iii) Information technology		
Demonstrate the effective use of IT for accessing databases and scientific literature; manipulating, processing and presenting data; presenting written assignments.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
(iv) Numeracy		
Understand and manipulate numerical data, solve problems using a variety of methods and apply numerical and statistical techniques to data analysis.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework
(v) Team working		
Demonstrate the ability to work as part of a group	Tutorials, group work, research projects.	Group reports, use of class data to generate practical reports
(vi) Problem solving		
Apply a scientific approach to the solution of problems in the context of their chosen specialisations and appreciate the rationale of experimental design.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework
(vii) Information handling		
Demonstrate the capacity to access a variety of resource materials and to analyse evidence from both experimental procedures and the literature.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work, directed reading, resource-based learning, and private study.	Examination and coursework
(viii) Skills for lifelong learning		
Demonstrate the acquisition of the skills and attributes necessary for lifelong learning, including: intellectual independence, effective time management, the ability to work as part of a team, the use of IT and the capacity to access and utilise a variety of resource materials.	Lectures, tutorials, seminars, practical classes, computer classes, discussions, fieldwork, research projects, group work, directed reading, resource-based learning, private study, career development programme.	Examination, coursework, personal development planning.

10. Progression points:

In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course.

The programme follows the standard scheme of progression set out in Senate Regulation 5 with the following additional requirements.

The Board of Examiners reserves the right to determine the progression of students who carry failed credits but have the right to a further resit: where these credits are in modules that are pre-requisite for subsequent modules or where the student has a low overall level of attainment, the Board can require the student to resit the failed modules without residence rather than proceed to the next year carrying failed modules to be resat alongside the current modules.

In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course

11. Scheme of Assessment

The programme follows the standard scheme of award and classification set out in Senate Regulation 5.

12. Special features:

Students receive a broad education in biological sciences, biomedical sciences and related disciplines in the first year, along with training in key skills. As the course progresses into the second and third years the students have the flexibility to specialise progressively within the specified subject streams or to retain a broader perspective. Opportunities are available to take placements within related industries, or to study in other European, American or Japanese universities.

The School has a strong reputation for research and the range of staff expertise enables provision of research-led programmes that offer breadth and depth.

13. Indications of programme quality

External examiner evaluations.

14. External Examiner(s) reports

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports for this programme can be found [here](#).

Appendix 3: Skills matrix

Appendix 1: Level 4, 5 and 6 programme structure (programme regulations)

BSc Biological Sciences

Year 1

Semester 1

Year 1

Semester 1

Core modules

BS1030 Biochemistry (30)

BS1040 Microbiology & Cell Biology (30)

Semester total: 60 credits

Semester total: 60 credits Semester 2 Core modules

BS1070 Adaptation & Diversity (20)

BS1050 Genes (20)

BS1060 Physiology, Pharmacology & Neuroscience (20)

Semester total: 60 credits

Year 2

Semester 1

Modules to a value of 60 credits to be chosen from:¹

BS2009 Genomes (15)

BS2013 Physiology and Pharmacology (15)

BS2015 Physiology of Excitable Cells (15)

BS2030 Principles of Microbiology (15)

BS3058 Conservation Biology (15)

MB2050 Medical Microbiology

BS2092 Molecular and Cell Biology (15)

Semester total: 60 credits

Semester 2

Core module:

BS2000 Research Topic (15)

Modules to a value of 45 credits chosen from:¹

BS2014 Exercise Physiology and Pharmacology (15)

BS2026 Genes, Development & Inheritance (15)

BS2032 Eukaryotic Microbiology and Immunology (15)

BS2040 Bioinformatics (15)

BS2066 Behavioural Neurobiology (15)

BS2077 Neurobiology & Animal Behaviour (15)

BS2078 A Field Guide to Evolution (15)

- BS2091 Biochemistry of Nucleic Acids (15)
 BS2093 Protein Control in Cellular Regulation (15)

Semester total: 60 credits

With a Year in Industry (option)

Core module:

BS3400 Year in Industry Research Placement (0) (Year-long)

Year 3

Semester 1

Core modules

Research Project: 30/45 credits.

Choose ONE from the following five options:

- i) BS3101 Experimental Research Project A (15) **and**
 BS3102 Experimental Research Project B (30) (Year-long module)
 OR
- ii) BS3201 Analytical Research Project (30)
 OR
- iii) BS3301 Education Research Project A (15) **and**
 BS3302 Education Research Project B (30) (Year-long module)
 OR
- iv) BS3501 Field Research Project A (Operation Wallacea) (15) **and**
 BS3102 Experimental Research Project B (30) (Year-long module)

For semester 1, make the credits add up to 60 by choosing from the modules listed below: ¹

- BS3000 Evolutionary Genetics (15)
- BS3010 Gene Expression: Molecular Basis & Medical Relevance (15)
- BS3015 Molecular and Cellular Immunology (15)
- BS3019 Plant Identification Skills (15)
- BS3031 Human Genetics (15)
- BS3054 Molecular & Cellular Pharmacology (15)
- BS3055 Molecular & Cellular Neuroscience (15)
- BS3064 Comparative Neurobiology (15)
- BS3068 Microbial Biotechnology (15)
- BS3070 Structural Biology (15)
- BS3078 Subtropical Physiology & Ecology (15)
- BS3058 Conservation Biology (15)

Semester total: 60 credits

Semester 2

For semester 2, make the credits add up to 60 by choosing from the modules listed below: ¹

- BS3003 Cancer Cell & Molecular Biology (15)
- BS3011 Microbial Pathogenesis and Genomics (15)
- BS3013 Human and Environmental Microbiomics (15)
- BS3016 Neuroscience Futures (15)
- BS3018 Genes & Development (15)
- BS3033 Physiology, Pharmacology and Behaviour (15)
- BS3056 Cellular Physiology of the Cardiovascular System (15)
- BS3059 Current and Future Therapeutics (15)
- BS3073 Conservation and Ecological Genetics (15)
- BS3080 Behavioural Ecology (15)

Semester total: 60 credits

¹ Module selection subject to timetable restrictions

BSc Biological Sciences (Biochemistry)

Year 1

Semester 1

Core modules

- BS1030 Biochemistry (30)
BS1040 Microbiology & Cell Biology (30)

Semester total: 60 credits

Semester total: 60 credits Semester 2 Core modules

- BS1070 Adaptation & Diversity (20)
BS1050 Genes (20)
BS1060 Physiology, Pharmacology & Neuroscience (20)

Semester total: 60 credits

Year 2

Semester 1

Core modules:

- BS2092 Molecular and Cell Biology (15)

Modules to a value of 45 credits to be chosen from:1

- BS2009 Genomes (15)
BS2013 Physiology and Pharmacology (15)
BS2015 Physiology of Excitable Cells (15)
BS2030 Principles of Microbiology (15)
BS2031 Virology (15)
BS2076 Evolutionary & Developmental Biology (15)

Semester total: 60 credits

Semester 2

Core modules:

- BS2000 Research Topic (15)
BS2091 Biochemistry of Nucleic Acids (15)
BS2093 Protein Control in Cellular Regulation (15)

Modules to a value of 15 credits chosen from: 1

- BS2014 Exercise Physiology and Pharmacology (15)
BS2026 Genes, Development & Inheritance (15)
BS2032 Eukaryotic Microbiology and Immunology (15)
BS2040 Bioinformatics (15)
BS2066 Behavioural Neurobiology (15)
BS2077 Neurobiology & Animal Behaviour (15)
BS2078 A Field Guide to Evolution (15)

Semester total: 60 credits

With a Year in Industry

Core module:

- BS3400 Year in Industry Research Placement (0) (Year-long)

Year 3

Semester 1

Core modules

Research Project: 30/45 credits.

Choose ONE from the following five options:

- i) BS3101 Experimental Research Project A (15) **and**
BS3102 Experimental Research Project B (30) (Year-long module)
OR
- ii) BS3201 Analytical Research Project (30)
OR
- iii) BS3301 Education Research Project A (15) **and**
BS3302 Education Research Project B (30) (Year-long module)
OR
- iv) BS3501 Field Research Project A (Operation Wallacea) (15) **and**
BS3102 Experimental Research Project B (30) (Year-long module)

Plus core module:

BS3070 Structural Biology (15)

Choose ONE, TWO or THREE modules from:

Semester 1

BS3010 Gene Expression: Molecular Basis & Medical Relevance (15)

BS3054 Molecular and Cellular Pharmacology (15)

Semester 2

BS3059 Current and Future Therapeutics (15)

Semester 1

For semester 1, make the credits add up to 60 by choosing from the modules listed below: ¹

BS3000 Evolutionary Genetics (15)

BS3015 Molecular & Cellular Immunology (15)

BS3019 Plant identification Skills (15)

BS3031 Human Genetics (15)

BS3055 Molecular and Cellular Neuroscience (15)

BS3064 Comparative Neurobiology (15)

BS3068 Microbial Biotechnology (15)

BS3078 Subtropical Physiology and Ecology (15)

Semester total: 60 credits

Semester 2

Core module:

BS3003 Cancer Cell & Molecular Biology (15)

Semester 2

For semester 2, make the credits add up to 60 by choosing from the modules listed below: ¹

BS3011 Microbial Pathogenesis and Genomics (15)

BS3013 Human and Environmental Microbiomics (15)

BS3016 Neuroscience Futures (15)

BS3018 Genes & Development (15)

BS3033 Physiology, Pharmacology and Behaviour (15)

BS3056 Cellular Physiology of the Cardiovascular System (15)

BS3073 Conservation and Ecological Genetics (15)

BS3080 Behavioural Ecology (15)

Semester total: 60 credits

¹ Module selection subject to timetable restrictions.

Semester 2

Core module:

For semester 2, make the credits add up to 60 by choosing from the modules listed below:¹

BS2014 Exercise Physiology and Pharmacology (15)

BS2026 Genes, Development & Inheritance (15)

BS2032 Eukaryotic Microbiology and Immunology (15)

BS2040	Bioinformatics (15)
BS2091	Biochemistry of Nucleic Acids (15)
BS2093	Protein Control in Cellular Regulation (15)

Semester total: 60 credits

With a Year in Industry (option)

Core module:

BS3400	Year in Industry Research Placement (0) (Year-long)
--------	---

Year 3

Core modules

Research Project: 30/45 credits.

Choose ONE from the following five options:

- i) BS3101 Experimental Research Project A (15) **and**
 BS3102 Experimental Research Project B (30) (Year-long module)
 OR
- ii) BS3201 Analytical Research Project (30)
 OR
- iii) BS3301 Education Research Project A (15) **and**
 BS3302 Education Research Project B (30) (Year-long module)
 OR
- iv) BS3501 Field Research Project A (Operation Wallacea) (15) **and**
 BS3102 Experimental Research Project B (30) (Year-long module)

Choose THREE OR FOUR modules from:

Semester 1

BS3064	Comparative Neurobiology (15)
BS3078	Subtropical Physiology & Ecology (15)

Semester 2

BS3073	Conservation and Ecological Genetics (15)
BS3080	Behavioural Ecology (15) <i>Semester 1</i>

Semester 1

For semester 1, make the credits add up to 60 by choosing from the modules listed below: ¹

BS3000	Evolutionary Genetics (15) (Recommended module)
BS3010	Gene Expression: Molecular Basis & Medical Relevance (15)
BS3015	Molecular and Cellular Immunology (15)
BS3019	Plant Identification Skills (15) (Recommended module)
BS3031	Human Genetics (15)
BS3054	Molecular & Cellular Pharmacology (15)
BS3055	Molecular & Cellular Neuroscience (15)
BS3068	Microbial Biotechnology (15)
BS3070	Structural Biology (15)
BS3058	Conservation Biology (15)

Semester total: 60 credits

Semester 2

For semester 2, make the credits add up to 60 by choosing from the modules listed below: ¹

BS3003	Cancer Cell & Molecular Biology (15)
BS3011	Microbial Pathogenesis and Genomics (15) (15)
BS3013	Human and Environmental Microbiomics (15)
BS3016	Neuroscience Futures (15)
BS3018	Genes & Development (15) (Recommended module)

BS3033 Physiology, Pharmacology and Behaviour (15) (Recommended module)
BS3056 Cellular Physiology of the Cardiovascular System (15)
BS3059 Current and Future Therapeutics (15)

Semester total: 60 credits

¹ Module selection subject to timetable restrictions.

BSc Biological Sciences (Neuroscience)

Year 1

Semester 1

Core modules

BS1030 Biochemistry (30)

BS1040 Microbiology & Cell Biology (30)

Semester total: 60 credits

Semester total: 60 credits Semester 2 Core modules

BS1070 Adaptation & Diversity (20)

BS1050 Genes (20)

BS1060 Physiology, Pharmacology & Neuroscience (20)

Semester total: 60 credits

Year 2

Semester 1

Core modules:

BS2013 Physiology and Pharmacology (15)

BS2015 Physiology of Excitable Cells (15)

Modules to a value of 30 credits to be chosen from:1

BS2009 Genomes (15)

BS2030 Principles of Microbiology (15)

BS2031 Virology (15)

BS2076 Evolutionary & Developmental Biology (15)

BS2092 Molecular and Cell Biology (15)

Semester total: 60 credits

Semester 2

Core modules:

BS2000 Research Topic (15)

BS2066 Behavioural Neurobiology (15)

Modules to a value of 30 credits chosen from: 1

BS2026 Genes, Development & Inheritance (15)

BS2032 Eukaryotic Microbiology and Immunology (15)

BS2040 Bioinformatics (15)

BS2078 A Field Guide to Evolution (15)

BS2091 Biochemistry of Nucleic Acids (15)

BS2093 Protein Control in Cellular Regulation (15)

Semester total: 60 credits

With a Year in Industry (option)

Core module:

BS3400 Year in Industry Research Placement (0) (Year-long)

Year 3

Semester 1

Core modules

Research Project: 30/45 credits.

Choose ONE from the following five options:

- i) BS3101 Experimental Research Project A (15) **and**

- | | | |
|------|--------|---|
| | BS3102 | Experimental Research Project B (30) (Year-long module) |
| | OR | |
| ii) | BS3201 | Analytical Research Project (30) |
| | OR | |
| iii) | BS3301 | Education Research Project A (15) and |
| | BS3302 | Education Research Project B (30) (Year-long module) |
| | OR | |
| iv) | BS3501 | Field Research Project A (Operation Wallacea) (15) and |
| | BS3102 | Experimental Research Project B (30) (Year-long module) |

Core module:

BS3055 Molecular & Cellular Neuroscience (15)

Choose TWO or THREE modules from:

Semester 1

BS3064 Comparative Neurobiology (15)
 BS3054 Molecular and Cellular Pharmacology (15)

Semester 2

BS3033 Physiology, Pharmacology and Behaviour (15)
 BS3059 Current and Future Therapeutics (15)

Semester 1

For semester 1, make the credits add up to 60 by choosing from the modules listed below: ¹

BS3000 Evolutionary Genetics (15)
 BS3010 Gene Expression: Molecular Basis & Medical Relevance (15)
 BS3015 Molecular & Cellular Immunology (15)
 BS3019 Plant identification Skills (15)
 BS3031 Human Genetics (15)
 BS3068 Microbial Biotechnology (15)
 BS3070 Structural Biology (15)
 BS3078 Subtropical Physiology & Ecology (15)

Semester total: 60 credits

Semester 2

Core module:

BS3016 Neuroscience Futures (15)

For semester 2, make the credits add up to 60 by choosing from the modules listed below: ¹

BS3003 Cancer Cell & Molecular Biology (15)
 BS3011 Microbial Pathogenesis and Genomics (15)
 BS3013 Human and Environmental Microbiomics (15)
 BS3018 Genes & Development (15)
 BS3073 Conservation and Ecological Genetics (15)
 BS3080 Behavioural Ecology (15)

Semester total: 60 credits

¹ Module selection subject to timetable restrictions.
