

**1. Programme Title(s) and UCAS code(s):**

BSc (Hons) Geography F800 BSc  
BSc (Hons) Geography (with Foundation Year) F899  
BSc (Hons) Geography with a year abroad \*

\* Selected when on course

A variant of this degree, with a year abroad, may also be taken.

**2. Awarding body or institution:**

University of Leicester

**3. a) Mode of study:**

Full time

**b) Type of study:**

Campus-based

**4. Registration periods:**

BSc (Hons) Geography

The normal period of registration is three years

The maximum period of registration is five years

BSc (Hons) Geography with a year abroad

The normal period of registration is four years

The maximum period of registration is six

years *For Foundation Year Variant:*

The normal period of registration is four years (one year for the Foundation Year, with three years for the BSc)

The maximum period of registration is six years (one year for the Foundation Year, and five years for the BSc)

**5. Typical entry requirements:**

ABB A level. Any three A levels usually required; Geography is not required. Two AS levels can be considered in place of one A level towards the total. General Studies accepted. BBB + EPQ at grade B, two AS-levels considered in place of one A-level. General Studies accepted. Key Skills also welcome. International Baccalaureate: Pass Diploma with 32 points

For Foundation Year Variant:

A level: ABB or points equivalent from best three A levels. Typically in subjects outside of the 'usual' A levels expected by the department.

BTEC Diploma: DDM in appropriate subject area.

Access to HE courses in Science and Engineering: 45 L3 credits, including 30 at Distinction and remaining L3 credits at least at Merit.

**6. Accreditation of Prior Learning:**

APL will not be accepted for exemptions from individual modules, however may be considered for direct entry to year 2, on a case by case and subject to the general provisions of the University APL policy.

For Foundation Year Variant:

n/a

## **7. Programme aims:**

For Foundation Year variant, see Foundation Year Programme Specification

The BSc in Geography aims to:

- develop students' knowledge and understanding of environmental systems and cycles, patterns and processes of environmental change and human-environment interactions at local to global scales;
- present a contemporary view of the world drawing on the breadth of the many geographical traditions with an emphasis on Physical Geography;
- provide an intellectually challenging and stimulating curriculum that draws on the research expertise of staff in the department and enables students to develop in-depth knowledge and understanding of specialised areas of physical geography;
- develop students' awareness of space and the world, and formulate geographical explanations for the phenomena they encounter;
- develop students' abilities to explore varied modes of geographical theories, techniques and concepts to analyse and explain the modern world;
- develop students' abilities to use and apply appropriate field, statistical and survey methods to analyse issues from a geographical perspective; and
- provide a learning experience in which students can develop and demonstrate a range of transferable skills necessary for effective independent learning;
- provide opportunities to develop employability skills, and career and personal development planning.

The BSc in Physical Geography with a Year Abroad aims, additionally, to:

- Widen students' experiences of worldwide Geography, the physical experience of social society and environmental place;
- Expose students to specialist elements of Geography that may not be taught at Leicester;
- Deepen students' understanding of Geography through exposure to its ideas at a senior level for an additional year.

## **8. Reference points used to inform the programme specification:**

- QAA Frameworks for Higher Education Qualifications in England Wales and Northern Ireland
- QAA Benchmark statement for [Geography 2014](#)
- PDR report (May 2015)
- [University Learning Strategy](#)
- University Employability Strategy
- NSS (2016)
- First Destination Survey
- External Examiner's Reports

## 9. Programme Outcomes:

Intended Learning Outcomes	Teaching and Learning Methods	How Demonstrated?
<b>(a) Discipline specific knowledge and competencies</b>		
<b>(i) Mastery of an appropriate body of knowledge</b>		
Demonstrate an appropriate body of geographical knowledge including patterns and processes of environmental systems and cycles, environmental change and human and environmental interactions.	Lectures, tutorials, seminars, computer-aided learning and computer-based practicals, laboratory based practicals, directed readings, independent research, student centered learning, presentations and discussion.	Essays, essay-based examinations, dissertations, presentations, contributions to discussion, practical reports, objective testing, problem-based exercises, field & lab notebooks, review papers, bibliographies
<b>(ii) Understanding and application of key concepts and techniques</b>		
Demonstrate knowledge of the different approaches to geographical explanation and interpretation. Demonstrate a competence in the varied methods of interpreting the physical environment. Recognise the ways in which physical, environmental, and cultural processes lead to the distinctiveness of places.	Lectures, tutorials, seminars, directed reading, independent research, computer practicals, group learning. Tutorials, seminars, directed reading, independent research, computer practicals, laboratory based practicals, group learning. Lectures, tutorials, seminars, directed reading, independent research, computer practicals, group learning.	Essays, essay-based examinations, dissertations, presentations, contributions to discussion, practical reports, objective testing, problem based exercises.
<b>(iii) Critical analysis of key issues</b>		
Critical evaluation of the theoretical, philosophical and methodological perspectives employed in physical geography; geography's role in interdisciplinary studies within natural and social sciences; and the role of physical geography in contemporary society. Awareness of advantages and problems of varied geographical methods of analysis. Critical reflection on research observations presented in the literature and own empirical research.	Lectures, tutorials, seminars, directed reading, independent research, computer practicals, group learning. Tutorials, seminars, directed reading, independent research, computer practicals, group learning. Tutorials, seminars, directed reading, independent research, computer practicals, group learning.	Essays, essay-based examinations, dissertations, presentations, contributions to discussion, practical reports, objective testing, problem based exercises.
<b>(iv) Clear and concise presentation of material</b>		
Use a variety of geographical and general methods to present information to a range of different audiences.	Tutorials, seminars, independent research, computer practicals, group learning.	Writing tasks, design, mapping and visualization tasks (e.g. posters, magazines), contributions to discussion, dissertations (presentation of independent research), presentation skills.

<b>Intended Learning Outcomes</b>	<b>Teaching and Learning Methods</b>	<b>How Demonstrated?</b>
<b>(v) Critical appraisal of evidence with appropriate insight</b>		
Formulate appropriate questions for geographical inquiry, and gather and utilise suitable evidence in answering them. Read, analyse and reflect critically and contextually on geographical texts and other source materials.	Tutorials, seminars, directed reading, independent research, computer practicals, group learning.  Tutorials, seminars, directed reading, independent research, computer practicals, group learning.	Writing tasks, design, mapping and visualization tasks, contributions to discussion, dissertations (presentation of independent research), presentation skills.
<b>(vi) Other discipline specific competencies</b>		
Conduct an independent piece of geographical research from problem formulation to evidence collection, result presentation and discussion. Use specialised techniques and approaches for the collection, interpretation and explanation of geographical processes and information. Use specialised techniques and approaches for the presentation of geographical information.	Dissertations; group and independent research. Field courses, computer practicals, laboratory practicals, lectures.  Dissertations; group and independent research. Field courses, computer practicals, laboratory practicals, lectures.  Dissertations; group and independent research. Field courses, computer practicals, laboratory practicals, lectures.	Dissertations; group and independent research.  Field reports, group and independent research; dissertations; tutorials; objective testing; laboratory reports.  Field reports, group and independent research; dissertations; design, mapping and visualization tasks.
<b>(b) Transferable skills</b>		
<b>(i) Oral communication</b>		
Demonstrate clear, fluent and coherent oral expressions of geographical issues. Participate effectively in group discussions of geographical issues.	Seminars, tutorials, field courses.  Seminars, tutorials, field courses.	Seminar and tutorial presentations, contributions to discussions.
<b>(ii) Written communication</b>		
Present coherent and fluent geographical arguments in a variety of written formats.	Seminars, tutorials, group working.	Essays, essay-based examinations, dissertations, practical reports.
<b>(iii) Information technology</b>		
Use information technology in general, and geographical information systems in particular to explore and analyse geographical concepts and information. Use IT to effectively support geographical studies, including the use of IT for bibliographic research, and written and visual presentation of information.	Induction programme, computer practical classes and independent research.  Computer practical classes, group and independent research.	Computer-based exercises. Independent research, dissertation, problem solving exercises, essays, web pages, posters, group reports.

<b>Intended Learning Outcomes</b>	<b>Teaching and Learning Methods</b>	<b>How Demonstrated?</b>
<b>(iv) Numeracy</b>		
Use statistical and graphic techniques to explore, analyse and visualise geographical concepts.	Lectures; computer practical classes, independent research	Computer-based exercises. Independent research, dissertation,
<b>(v) Team working</b>		
Work effectively and collaboratively in teams to collectively explore geographical concepts and tasks.	Tutorials, seminars, team problem solving, field courses.	Seminar and tutorial working, problem solving exercises.
<b>(vi) Problem solving</b>		
Explore geographical problem spaces with contemporary discourses and approaches	Tutorials, seminars, team problem solving, field courses.	Computer-based exercises. Independent research, dissertation, problem solving exercises.
<b>(vii) Information handling</b>		
Gather, retrieve and manipulate geographical evidence and information in support of geographical arguments Analyse information from a variety of sources to develop and construct geographical arguments and interpretations.	Tutorials, seminars, directed reading, independent research, computer practicals, team problem solving, field courses.  Tutorials, seminars, directed reading, independent research, computer practicals, team problem solving, field courses.	Essays, essay-based examinations, dissertations, practical reports., seminar and tutorial working, problem solving exercises, team problem solving
<b>(viii) Skills for lifelong learning</b>		
Demonstrate intellectual development and independence through the setting of research tasks and the solving of geographical problems. Reflect upon own learning and use personal development planning to plan personal, academic and career development. Manage time effectively to meet targets and deadlines.	All of the above particularly, independent research and seminar presentations  All of the above, particularly tutorials, Personal and Development Planning  All of the above, particularly independent research and self-directed study.	All of the above, particularly, dissertations, seminars, essays, independent research.  Discussions with personal and other tutors; Curriculum vitae writing. Employability & career development module.  All of the above, particularly, dissertations, seminars, essays, independent research.

### 10. Progression points:

A key progression point is the requirement to pass the dissertation proposal for GY2435 before progression to GY3420 can be considered. An opportunity to resit is allowed in July; a further fail at this point will result in a resit without residence, with no immediate progression to Year 3. Further failure will trigger a withdrawal from the course. In other regards, progression on this course follows Senate Regulation 5.

For Foundation Year Variant:

Progression from Year 0 to year 1: In cases where a student has failed to meet a requirement to progress he or she will be required to withdraw from the course. Students will be required to pass Foundation Year in order to progress to Year 1 with an average module mark of at least 60%.

### **11. Scheme of Assessment**

The programme follows the standard scheme of award and classification set out in [Senate Regulation 5](#).

### **12. Special features:**

Study in the field remains an integral part of the geography curriculum and the department runs field courses to a number of destinations around the world. Staff are engaged in internationally recognised research in the three principal areas of geography: Human Geography, Physical Geography, and Earth Observation and Geographical Information Science, specialising in Globalisation and Difference, Environment and Culture Development and Transition, Environmental Processes and Change in Low Latitudes.

### **13. Indications of programme quality**

External Examiner's reports have repeatedly praised the breadth of the education and the dedication of the staff.

### **14. External Examiners**

The details of the External Examiner(s) for this programme and the most recent External Examiners' reports can be found [here](#).

## Appendix 1: Programme structure for 2017/18 (Programme regulations)

---

### BSc GEOGRAPHY

---

#### FIRST YEAR MODULES

##### SEMESTER 1

Core Modules		Credits
GY1411	HUMAN GEOGRAPHY FOR A GLOBALIZED WORLD	15
GY1423	EXPLORING OUR DIGITAL PLANET	15
GY1422	STUDY SKILLS FOR PROFESSIONAL GEOGRAPHERS	15
GY1431	EVOLUTION OF THE EARTH SYSTEM	15
<b>Semester Total</b>		<b>60</b>

##### SEMESTER 2

Core Modules		Credits
GY1412	ENVIRONMENT/NATURE/SOCIETY	15
GY1433	FIELD AND LABORATORY TECHNIQUES FOR PHYSICAL GEOGRAPHERS	15
GY1421	WORKING WITH GEOGRAPHICAL INFORMATION	15
GY1432	LANDSCAPE-ECOSYSTEM DYNAMICS	15
<b>Semester Total</b>		<b>60</b>

#### SECOND YEAR MODULES

##### SEMESTER 1

Core Modules		Credits
GY2431	DATA ANALYSIS	15
GY2432	LABORATORY TECHNIQUES	15

**Optional Modules** **Credits**  
30 CREDITS OF APPROVED OPTIONAL MODULES SELECTED FROM

GY2411	ENVIRONMENT AND DEVELOPMENT	15
GY2433	CATCHMENT SYSTEMS	15
GY2434	THE DYNAMIC BIOSPHERE	15
<b>Semester Total</b>		<b>60</b>

##### SEMESTER 2

Core Modules		Credits
GY2435	GEOGRAPHICAL RESEARCH DESIGN (OVERSEAS FIELD COURSE)*	30

**Optional Modules** **Credits**  
30 CREDITS OF APPROVED OPTIONAL MODULES SELECTED FROM

GY2422	GEOGRAPHY IN EDUCATION	15
GY2424	REMOTE SENSING FOR GEOGRAPHERS	15
GY2421	GEOGRAPHICAL INFORMATION SCIENCE	15
GY2436	GLACIAL WORLDS	15
<b>Semester Total</b>		<b>60</b>

\*Qualifying mark of 40% in dissertation proposal is required for progression into year 3

## THIRD YEAR MODULES

### SEMESTER 1

#### Core Modules

Credits

GY3420	GEOGRAPHY DISSERTATION	30
--------	------------------------	----

#### Optional Modules

Credits

30 CREDITS OF APPROVED OPTIONAL MODULES SELECTED FROM

GY3411	CONTEMPORARY ENVIRONMENTAL CHALLENGES	15
GY3425	CRITICAL DIGITAL GEOGRAPHIES	15
GY3430	CALIFORNIAN DRYLANDS	15
GY3431	NEOTROPICAL RAINFORESTS	15
GY3432	CLIMATE CHANGE: IMPACTS, VULNERABILITY AND ADAPTATION	15
GY3433	QUATERNARY ENVIRONMENTAL CHANGE	15

Semester Total 60

### SEMESTER 2

#### Optional Modules

Credits

Credits

60 CREDITS OF APPROVED OPTIONAL MODULES SELECTED FROM

GY3421	INFORMATION VISUALISATION	15
GY3435	WATER QUALITY PROCESSES AND MANAGEMENT	15
GY3434	STABLE ISOTOPES IN THE ENVIRONMENT	15
GY3437	THE BIOSPHERE IN THE EARTH SYSTEM	15
GY3424	REMOTE SENSING FOR GEOGRAPHERS	15
GY3422	GEOGRAPHICAL INFORMATION SCIENCE	15
GY3439	UNDERSTANDING THE TROPICAL FORESTS OF SE ASIA	15
GY3438	RIVER DYNAMICS	15
GY3436	AFRICAN DRYLANDS	15

Semester Total 60

---

## BSc GEOGRAPHY WITH A YEAR ABROAD

---

Approved institutions for Geography include those listed at <http://www2.le.ac.uk/offices/international/overseas-exchange/outgoing/where-can-i-go/exchanges-by-academic-subject/geography>.

### FIRST, SECOND AND FOURTH YEAR MODULES

Regulations for the first and second year are the same as for the B.Sc. degree in Geography. Regulations for the fourth year of the course are the same as for the third year of the B.Sc. degree in Geography.

### THIRD YEAR MODULES

The third year will be spent abroad in the USA, Canada, Finland, Spain, Germany and the Netherlands taking approved courses in one of the institutions associated with the Department of Geography. Level 3 modules from the Geography and Environmental Sciences Departments of the host Institution, plus introductory language modules, to the same overall credit value per year as Leicester. A small proportion of modules in other subjects may be taken by prior agreement of the International Officer in the Department of Geography, University of Leicester. Students will be required to reach a prescribed level of attainment in the work done abroad (a pass in Leicester terms according to the mark translation). Any student failing the year abroad component will revert back to the standard Leicester variant of their degree.

### Appendix 2: Module specifications

See module specification database <http://www.le.ac.uk/sas/courses/documentation>

**Appendix 3: Skills matrix**

**Appendix 4: Foundation Year Programme Specification**
