Supporting Families with Cancer
Supporting families to help prevent inherited cancers

Cancer prevention through diet and drugs, Lifestyle advice and support, and ‘Let us know your views’
Saturday 12 October 2013, 1.30pm – 5.00pm
Maurice Shock Building, University of Leicester

Come and meet with specialists, ask questions, share your views and find out more about preventing or delaying the onset of inherited cancer. Including:

- The role of diet, Tamoxifen and Turmeric in preventing cancer
- Physiotherapy individual advice sessions for safe and effective exercise
- Information, advice and support group stalls
- A chance to have your say about how we can best support and protect families with cancer

All welcome, especially if you are concerned about cancer in the family
