

FRIDAY 22 JUNE

LEICESTER UNIVERSITY OF SANCTUARY PRESENTS...

RESILIENCE

Resilience tells the stories of three asylum seekers from Zimbabwe who have been living in Britain for more than 15 years with unresolved status. This short film explores emotional entanglements as well as the resilience and creativity deployed by individuals during their life in exile. While they sometimes run in parallel, the diversity and uniqueness of these personal trajectories deconstructs the uniform and stereotyped representation of migrants.
